

Anti-Rabbit IgG(H+L), AlpSdAbs® VHH

Summary

Code 025-102-001

Immunogen Recombinant Rabbit IgG

Host Alpaca pacous

lsotype VHH domain of alpaca IgG2b/2c

Conjugate Unconjugated(6*his tag and one cys were added at the C terminal of the VHH)

Specificity Rabbit IgG(H+L)

Cross-Reactivity No cross-reactivity with mouse, human, cynomolgus, rat, goat IgG

Purity Recombinant Expression and Affinity purified

Concentration 1mg/ml

Formation Liquid, 10mM PBS(pH 7.5), 0.05% sucrose, 0.1% trehalose, 0.01% proclin300 Storage Store at -20 °C(Avoid freeze / thaw cycles), Stable for 12 months at -20 °C

Description

Anti-Rabbit IgG(H+L), AlpSdAbs® VHH is designed for detecting rabbit IgG IgG(H+L) specifically. Anti-Rabbit IgG(H+L), AlpSdAbs® VHH is monovalent, recombinant single domain antibody derived from the variable regions of heavy chain of Alpaca pacous. Based on immunoelectrophoresis and/or ELISA, Anti-Rabbit IgG(H+L), AlpSdAbs® VHH reacts with rabbit IgG IgG(H+L) selectively, no reactivity with mouse, human, cynomolgus, rat, goat IgG.

Background

Rabbit research antibodies are widely used in life science research. So far, four isotypes have been identified (IgA, IgE, IgG, and IgM) in rabbits. Each isotype has a different heavy chain. Rabbit has only one IgG subclass. The whole IgG molecule possesses both the Fc region and the Fab region, which possessing the epitope-recognition site. The IgG contains two heavy and light chains. The heavy chain is about 50 KD and the light chain is about 25 KD. The common IgG is monomeric with a molecular weight of approximately 150 kD.

VHH are single-domain antibodies derived from the variable regions of heavy chain of Camelidae immunoglobulin. The size of VHH is extremely small(<15KDa) compared to other forms of antibody fragment, which significantly increase the permeability of VHH. Thus VHH is considered of great value for research, diagnostics and therapeutics.

Benefits

High lot-to-lot consistency Increased sensitivity and higher affinity Animal-free production

Suggested Working Concentration

ELISA 1:10000-1:50000 WB 1:10000-1:50000

Dilution factors are presented in the form of a range because the optimal dilution is a function of many factors, such as antigen density, permeability, etc. The actual dilution used must be determined empirically.

This product is for research use only and is not approved for use in humans or in clinical
